### **REASONS FOR ALLOWANCE**

1. Claims 1-14, 17-35, 52-55 and 59 are allowed.

Following is the Examiner's statement of reasons for allowance.

The prior art or record specifically Gerlach (U.S. patent 5,469,532) and Snipp (U.S. patent 5,699,495) fail to suggest or disclose the collective features of the invention such as: "printing of the subsequent page requiring printer resources different from the printer resources required to print the present page and the resource information required to print the at least one subsequent page being different from the resource information required to print the current page" along with the rest of the limitations of claim 1 and 14 renders claims 1, 14 and 59 allowable.

The features of "the resources information for at least one of the subsequent pages differing from the resource information of the current page and being, on the current page, the document having a current page and subsequent pages, the printer having a printer processor, the printer processor being arranged" along with the rest of the limitations of the claims 17, 21 and 35 renders said claims allowable.

The features of: "resource information derived from the instruction data indicative of printer processor resources required by the printer at different document printing stages, the resource information at the different document printing stages differing from each other, the resource information being supplied as page description language located in page headers for enabling the printer to learn, in advance of processing instruction data for a document printing stage, the printer resources required to process instruction data for that document printing stage" would render claim 52 and 54 allowable.
